# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Medford Weather:**

A cold front is expected to come inland this evening, light rain is expected and will continue into Sunday morning. The early part of next week still looks dry as a ridge of high pressure builds northward along the west coast.

#### **Eureka weather:**

Dry weather is expected today before another weak system brings some light rain tonight and Sunday. High pressure returns bringing warm and dry weather Monday and Tuesday. Chances for more significant rain and a return of cooler temperatures are expected by the middle of next week.

#### **Reno Weather:**

Above average temperatures along with light winds under high pressure will persist into early next week. Mid and high clouds will stream across the region periodically. A moderate winter storm is possible for Wednesday and Thursday next week with gusty winds, rain and mountain snow.

#### **Sacramento Weather:**

Expect dry and mild weather through early next week with well above normal temperatures. Wetter and cooler weather pattern expected middle to late next week.

#### **San Francisco Weather:**

Dry weather will continue through the weekend and into early next week. Patchy fog and low clouds will continue in coastal areas through the morning. Otherwise, mostly clear skies are expected into early next week. Offshore flow will develop by Sunday morning which will result in a warming trend from Sunday into Tuesday. Rain is possible by the middle of next week. Large long-period westerly swell will continue to impact the coast through this evening, creating hazardous conditions at area beaches, including sneaker waves.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Hanford Weather:**

High pressure will continue to bring dry weather to the central California interior through Tuesday with patchy night and morning fog in the San Joaquin valley. A storm system may bring rain and high sierra snow to the central California interior during the middle of next week.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

A weak upper level trough passing to the north of the region will bring a bit of cooling today. A building ridge aloft and offshore winds will bring well above normal to possibly record high temperatures Sunday through Tuesday. An upper level low will bring cooling Wednesday, with a chance of showers late Wednesday into Thursday. This will be followed by dry weather with seasonable temperatures.

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

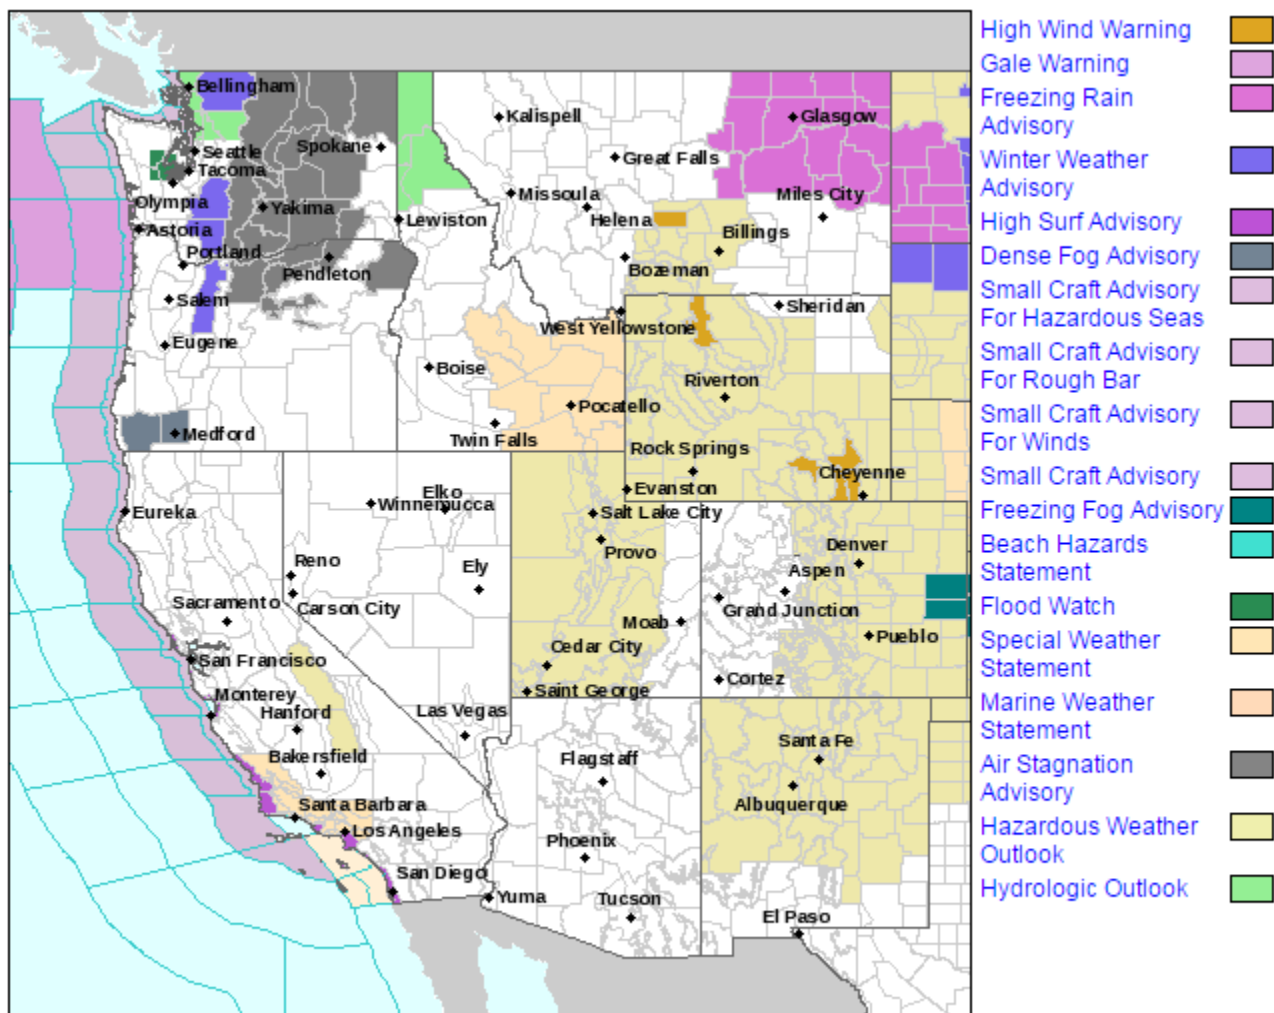

High pressure aloft over the eastern pacific will move toward California. It will be cooler towards the coast today with areas of dense fog near the coast early this morning, then warmer for Sunday and Monday with well above average temperatures for inland areas expanding towards the coast. Surface high pressure over the great basin will bring periods of gusty Santa Ana winds for late tonight into Tuesday with strongest winds for Monday. For late Wednesday into Thursday, trough of low pressure moving inland through California could bring a chance of showers.

#### **Southeast California Weather:**

Warm and dry conditions will continue across the region through early next week. The next chance for precipitation comes late next week as a storm system moves through the area.
